---	--	---	--	---

Go for a walk, do some indoor recess on [GoNoodle](#), run some laps, ...

Independent Reading for 15-20 minutes

Fluency Reading--WPM: To determine the words per minute (WPM) you are reading, you time your reading and take the number of minutes, multiply it by 60, then add the number of seconds. Then you divide the number of **words** you **read** by the number of seconds. Then you multiply your answer by 60 to get your final **wpm** count.
